

Colour	Lens Name	Transmission	Protection	Conditions	Contrast	Description
	+ Red Iridium Lens	15%	3	Medium to Bright Light	Contrast	Medium to bright light. Features a neutral lens tint with an Iridium coating to tune contrast and reduce glare.
	+ Red Iridium Polarised Lens	18%	3	Medium to bright light	Neutral	Medium to bright light. Features a neutral lens tint with an Iridium coating to tune contrast. Polarized filter reduces glare reflected off surfaces like pavement or asphalt.
	+ Red Iridium Vented Lens	15%	3	Medium to Bright Light	Contrast	Medium to bright light. Features a neutral lens tint with an Iridium coating to tune contrast and reduce glare.
	24K Gold Iridium Lens	13%	3	Medium to Bright Light	Contrast	
	24K Iridium Lens	13%	3	Medium to Bright Light	Contrast	
	Amber Polarised Lens	30%	2	Flat to Medium Light	Contrast	Sport performance lens for flat to medium light. High contrast design that cuts blinding glare while enhancing visual acuity. Excellent for shallow water fishing.
	Black Gradient Lens	35%	2	Medium to Low Light	Neutral	Medium to low light. Neutral tint with smooth transition in shading from darker top to lighter bottom. Offers truer color perception.
	Black Grey Gradient Lens	16%	3	Medium to Bright Light	Neutral	Medium to bright light. Excellent all-purpose lens. Neutral tint for truer color perception. Smooth transition in shading from darker top to lighter bottom.
	Black Iridium (Vented) Lens	10%	3	Extremely Bright Light	Neutral	Extremely bright light. Excellent all-purpose lens for sunny conditions. Offers truer color perception. Features an Iridium coating to reduce glare.
	Black Iridium Lens	10%	3	Extremely Bright Light	Neutral	Extremely bright light. Excellent all-purpose lens for sunny conditions. Offers truer color perception. Features an Iridium coating to reduce glare.
	Black Iridium Polarised Lens	9%	3	Extremely Bright Light	Neutral	Extremely bright light. Comfortable lens tint that offers truer color perception. Features an Iridium® coating for maximized glare reduction.
	Black Iridium Vented Lens	10%	3	Extremely Bright Light	Neutral	Extremely bright light. Excellent all-purpose lens for sunny conditions. Offers truer color perception. Features an Iridium coating to reduce glare.
	Black Persimmon Iridium Photochromic Lens	42% to 10%	2	Flat to Bright Light	Contrast	Sport performance lens for flat to bright light. Filters blue light to boost contrast and increase depth perception in a wide variety of light conditions. Excellent for mountain biking and golf, and any other sport that takes you in and out of shaded areas.
	Black Persimmon Iridium Photochromic Vented Lens	42% to 10%	2	Flat to Bright Light	Contrast	Sport performance lens for flat to bright light. Filters blue light to boost contrast and increase depth perception in a wide variety of light conditions. Excellent for mountain biking and golf, and any other sport that takes you in and out of shaded areas.
	Black Persimmon to Grey Transition Lens	42% to 10%	2	Flat to Bright Light	Contrast	Sport performance lens for flat to bright light. Filters blue light to boost contrast and increase depth perception in a wide variety of light conditions. Excellent for mountain biking and golf, and any other sport that takes you in and out of shaded areas.
	Black Persimmon Transitions Lens	42% to 10%	2	Flat to Bright Light	Contrast	Sport performance lens for flat to bright light. Filters blue light to boost contrast and increase depth perception in a wide variety of light conditions. Excellent for mountain biking and golf, and any other sport that takes you in and out of shaded areas.

Colour	Lens Name	Transmission	Protection	Conditions	Contrast	Description
	Black Violet Gradient Lens	23%	2	Medium Light	Contrast	Medium light. High contrast tint that enhances detail. Smooth transition in shading from darker top to lighter bottom.
	Blue Iridium Lens	15%	3	Sunny	Contrast	Medium to bright light. Utilizes a contrast-enhancing VR28 lens tint with an Iridium coating to further tune contrast and reduce glare.
	Blue Iridium Vented Lens	32%	2	Medium to Bright Light	Contrast	Medium to bright light. Utilizes a contrast-enhancing VR28 lens tint with an Iridium coating to further tune contrast and reduce glare.
	Bronze Lens	22%	2	Sunny	Contrast	Medium to bright light. Excellent all-purpose lens with enhanced contrast for sunny conditions.
	Bronze Polarised Lens	15%	3	Medium to Bright Light	Contrast	Medium to bright light. Excellent all-purpose lens that cuts blinding glare while boosting contrast and depth perception.
	Brown Gradient Lens	25%	2	Medium Light	Contrast	Medium light. Contrast-boosting tint with smooth transition in shading from darker top to lighter bottom.
	Chrome Iridium Lens	12%	3	Medium to Bright Light	Contrast	Extremely bright light. Excellent all-purpose lens for sunny conditions. Offers truer color perception. Features an Iridium® coating to reduce glare.
	Clear (Vented) Lens	93%	0	Very Low Light, Indoor Use	Neutral	Very low light or indoor use only. Allows the maximum amount of light through while still filtering out 100% of all harmful UV.
	Clear Black Iridium Photochromic Lens	Activated: 10%, Faded: 66%	Activated: 3, Faded: 1	Overcast to Sunny	Neutral	Sport performance lens for flat to bright light. Neutral transmission for truer color perception across a wide variety of light conditions.
	Clear Black Iridium Photochromic Vented Lens	Activated: 10%, Faded: 66%	Activated: 3, Faded: 1	Overcast to Sunny	Neutral	Sport performance lens for flat to bright light. Neutral transmission for truer color perception across a wide variety of light conditions.
	Clear Lens	93%	0	Very Low Light, Indoor Use	Neutral	Very low light or indoor use only. Allows the maximum amount of light through while still filtering out 100% of all harmful UV.
	Clear Vented Lens	93%	0	Very Low Light, Indoor Use	Neutral	Very low light or indoor use only. Allows the maximum amount of light through while still filtering out 100% of all harmful uv.
	Dark Bronze Lens	12%	3	Extremely Bright Light	Contrast	Extremely bright light. Excellent all-purpose contrast-enhancing lens for sunny conditions.
	Dark Grey Lens	10%	3	Intense Sun	Neutral	Extremely bright light. Excellent all-purpose lens that offers truer color perception in sunny conditions.
	Deep Blue Polarised Lens	10%	3	Intense Sun	Neutral	Fishing Specific. Engineered to cut out harsh glare in a dominantly blue environment. Ideal for bright and sunny conditions on the open water.
	Emerald Iridium Lens	13%	3	Sunny	Neutral	Medium to bright light. Neutral lens tint for truer color perception. Features an Iridium coating to reduce glare. Excellent in hot, sunny conditions.

Colour	Lens Name	Transmission	Protection	Conditions	Contrast	Description
	Fire Iridium (Vented) Lens	16%	3	Medium to Bright Light	Contrast	Medium to bright light. Improves visual acuity. Features an Iridium coating to further tune contrast and reduce glare.
	Fire Iridium Lens	16%	3	Medium to Bright Light	Contrast	Medium to bright light. Improves visual acuity. Features an Iridium coating to further tune contrast and reduce glare.
	Fire Iridium Vented Lens	16%	3	Medium to Bright Light	Contrast	Medium to bright light. Improves visual acuity. Features an Iridium coating to further tune contrast and reduce glare.
	Fire Lens	16%	3	Medium to Bright Light	Contrast	Medium to bright light. Improves visual acuity. Features an Iridium coating to further tune contrast and reduce glare.
	Fire Vented Lens	16%	3	Medium to Bright Light	Contrast	Medium to bright light. Improves visual acuity. Features an Iridium coating to further tune contrast and reduce glare.
	FMJ Gold Iridium Lens	12%	3	Intense Sun	Contrast	Extremely bright light. Excellent all-purpose contrast-enhancing lens for sunny conditions. Features an Iridium coating to reduce glare.
	G20 Black Iridium Lens	15%	3	Medium to Bright Light	Contrast	Sport performance lens for medium to bright light. Rose tint to enhance contrast and image resolution (visual clarity) in low light. Features an Iridium coating to reduce glare.
	G20 Lens	20%	3	Medium to Bright Light	Neutral	Medium to bright light. High-contrast rose tint for improved image resolution (visual clarity) in a wide variety of conditions.
	G26 Iridium and HI Persimmon Lenses	26 and 59%	2 and 1	Flat to medium light and Flat to low light	Contrast and Contrast	Target-shooting-specific lens for flat to medium light. Enhances orange in targets while increasing contrast against green and blue backgrounds. Not to be used for other activities. and Sport performance lens for flat to low light. Filters blue light to boost contrast and enhance depth perception. Features an Iridium coating to reduce glare and balance light transmission.
	G26 Iridium Lens	26%	2	Flat to Medium Light	Contrast	Target-shooting-specific lens for flat to medium light. Enhances orange in targets while increasing contrast against green and blue backgrounds. Not to be used for other activities.
	G30 (Vented) Lens	30%	2	Flat to Medium Light	Contrast	Sport performance lens for flat to medium light. Rose base with a subtle Iridium coating to improve contrast and depth perception in blues and greens. Excellent for golf.
	G30 Black Iridium Lens	25%	2	Flat to Medium Light	Contrast	Medium light. Rose base with an Iridium coating to improve contrast and reduce glare.
	G30 Iridium Lens	30%	2	Flat to Medium Light	Contrast	Sport performance lens for flat to medium light. Rose base with a subtle Iridium coating to improve contrast and depth perception in blues and greens. Excellent for golf.
	G30 Iridium Lenses	30%	2	Flat to Medium Light	Contrast	Sport performance lens for flat to medium light. Rose base with a subtle Iridium coating to improve contrast and depth perception in blues and greens. Excellent for golf.
	G30 Iridium Vented Lens	30%	2	Flat to Medium Light	Contrast	Sport performance lens for flat to medium light. Rose base with a subtle Iridium coating to improve contrast and depth perception in blues and greens. Excellent for golf.
	G30 Lens	30%	2	Flat to Medium Light	Contrast	Sport performance lens for flat to medium light. Rose base with a subtle Iridium coating to improve contrast and depth perception in blues and greens. Excellent for golf.

Colour	Lens Name	Transmission	Protection	Conditions	Contrast	Description
	G30 Vented Lens	30%	2	Medium to Bright Light	Contrast	Medium to bright light. Rose base with subtle Iridium coating to improve contrast and depth perception in a wide variety of conditions.
	G40 Black Gradient Lens	19%	2	Medium to Bright Light	Contrast	Medium to bright light. Muted rose tint for improved contrast and image resolution (visual clarity) in low light. Smooth transition in shading from darker top to lighter bottom.
	G40 Photochromic Lens	40% to 9%	2	Medium to Extremely Bright Light	Contrast	Sport performance lens for medium to extremely bright light. Muted rose tint for improved contrast and image resolution (visual clarity) across a wide variety of light conditions.
	G40 Transitions Lens	40% to 9%	2	Medium to Extremely Bright Light	Contrast	Sport performance lens for medium to extremely bright light. Muted rose tint for improved contrast and image resolution (visual clarity) across a wide variety of light conditions.
	Gold Iridium and G30 Iridium Vented Lenses	12 and 30%	3 and 2	Extremely bright light and Flat to medium light	Contrast and Contrast	Extremely bright light. Excellent all-purpose contrast-enhancing lens for sunny conditions. Features an Iridium coating to reduce glare. and Sport performance lens for flat to medium light. Rose base with a subtle Iridium coating to improve contrast and depth perception in blues and greens. Excellent for golf.
	Gold Iridium Lens	12%	3	Intense sun	Contrast	Extremely bright light. Excellent all-purpose contrast-enhancing lens for sunny conditions. Features an Iridium coating to reduce glare.
	Grey Lens	18%	2	Medium to Bright Light	Neutral	Medium to bright light. Excellent all-purpose lens offering truer color perception in sunny conditions.
	HI Persimmon Lens	59%	1	Flat to low light	Contrast	Sport performance lens for flat to low light. Filters blue light to boost contrast and enhance depth perception. Features an Iridium coating to reduce glare and balance light transmission.
	HI Yellow Lens	86%	0	Overcast	Contrast	Flat to very low light. Features an Iridium coating for tuned contrast and reduced glare, perfect for extremely flat light or foggy conditions.
	Ice Iridium Lens	10%	3	Extremely Bright Light	Neutral	Extremely bright light. Neutral lens tint for truer color perception. Features an Iridium coating to reduce glare.
	Ice Lens	10%	3	Extremely Bright Light	Neutral	Extremely bright light. Neutral lens tint for truer color perception. Features an Iridium coating to reduce glare.
	Jade Iridium Lens	17%	3	Medium to Bright Light	Neutral	Medium to bright light. Neutral lens tint for truer color perception. Features an Iridium® coating to reduce glare. Excellent in hot, sunny conditions.
	Light + Red Iridium Lens	40%	2	Partly Cloudy	Contrast	Features a neutral lens tint with a specialized Iridium coating to tune contrast and reduce infrared light.
	Light Grey to Grey Transition Lens	38% to 9%	2	Medium to Extremely Bright Light	Neutral	Medium to extremely bright light. Neutral transmission for truer color perception across a wide variety of light conditions.
	Light Grey Transitions Lens	38% to 9%	2	medium to extremely bright light	Neutral	Medium to extremely bright light. Neutral transmission for truer color perception across a wide variety of light conditions.
	Light Positive Red (Vented) Lens	40%	2	Partly Cloudy	Contrast	Features a neutral lens tint with a specialized Iridium coating to tune contrast and reduce infrared light.

Colour	Lens Name	Transmission	Protection	Conditions	Contrast	Description
	OO Polarised Black Iridium Lens	10%	3	Enhanced Contrast	Contrast	OO Polarised features a unique filter that balances light waves to provide rich, vibrant color and enhanced visual contrast. Helping you judge depth and distance better while letting you see all the fine detail.
	OO Polarised Grey Lens	19%	2	Enhanced Contrast	Contrast	
	OO Polarised Red Iridium Lens	18%	2	Enhanced Contrast	Contrast	OO Polarised features a unique filter that balances light waves to provide rich, vibrant color and enhanced visual contrast. Helping you judge depth and distance better while letting you see all the fine detail.
	Persimmon (Vented) Lens	61%	1	Flat to Low Light	Contrast	Sport performance lens for flat to low light. Filters blue light to boost contrast and enhance depth perception in overcast or shaded conditions.
	Persimmon Lens	61%	1	Flat to Low Light	Contrast	Sport performance lens for flat to low light. Filters blue light to boost contrast and enhance depth perception in overcast or shaded conditions.
	Polarised Amber Black Iridium Lens	30%	2	Flat to Medium Light	Contrast	Sport performance lens for flat to medium light. High contrast design that cuts blinding glare while enhancing visual acuity. Excellent for shallow water fishing.
	Polarised Amber Lens	30%	2	Flat to Medium Light	Contrast	Sport performance lens for flat to medium light. High contrast design that cuts blinding glare while enhancing visual acuity. Excellent for shallow water fishing.
	Polarised Black Iridium (Vented) Lens	9%	3	Intense sun	Neutral	Extremely bright light. Comfortable lens tint that offers truer color perception. Features an Iridium coating for maximized glare reduction.
	Polarised Black Iridium Lens	9%	3	Intense sun	Neutral	Extremely bright light. Comfortable lens tint that offers truer color perception. Features an Iridium coating for maximized glare reduction.
	Polarised Bronze Lens	15%	3	Sunny	Contrast	Medium to bright light. Excellent all-purpose lens that cuts blinding glare while boosting contrast and depth perception.
	Polarised Fire Iridium Lens	10%	3	Extremely Bright Light	Contrast	Sport performance lens for extremely bright light. High-contrast glare-cutting design with a highly reflective Iridium coating to enhance greens and reds.
	Polarised Fire Lens	10%	3	Extremely Bright Light	Contrast	Sport performance lens for extremely bright light. High-contrast glare-cutting design with a highly reflective Iridium coating to enhance greens and reds.
	Polarised Gold Iridium Lens	9%	3	Extremely Bright Light	Contrast	Extremely bright light. Excellent all-purpose contrast-enhancing lens for sunny conditions. Features an Iridium coating for maximized glare reduction.
	Polarised Grey Lens	17%	3	Sunny	Neutral	Medium to bright light. Excellent all-purpose lens that cuts blinding glare while offering truer color perception.
	Polarised Ice Iridium Lens	9%	3	Extremely Bright Light	Neutral	Extremely bright light. Features truer color perception with a highly reflective lens for maximized glare reduction.
	Polarised Ice Lens	9%	3	Extremely Bright Light	Neutral	Extremely bright light. Features truer color perception with a highly reflective lens for maximized glare reduction.

Colour	Lens Name	Transmission	Protection	Conditions	Contrast	Description
	Polarised Light Grey Lens	25%	2	Medium Light	Neutral	Medium light. Neutral transmission for truer color perception. Ideal for cutting glare in mixed or changing conditions
	Polarised Positive Red Iridium Lens	18%	3	Medium to bright light	Neutral	Medium to bright light. Features a neutral lens tint with an Iridium coating to tune contrast. Polarized filter reduces glare reflected off surfaces like pavement or asphalt.
	Polarised Titanium Iridium Lens	12%	3	Medium to Bright Light	Contrast	Medium to bright light. High-contrast glare-cutting lens with a highly reflective Iridium coating.
	Polarised Tungsten Iridium Lens	15%	3	Intense sun	Contrast	Medium to bright light. Cuts harsh glare and sharpens visual acuity. Features a subtle Iridium coating to further reduce glare and tune contrast.
	Polarised VR28 Black Iridium Lens	10%	3	Extremely Bright Light	Contrast	Sport performance lens for extremely bright light. Cuts blinding glare while filtering blue light to enhance visual acuity and improve depth perception. Features an Iridium coating to further tune contrast.
	Polarised VR28 Gold Iridium Lens	11%	3	Extremely Bright Light	Contrast	Sport performance lens for extremely bright light. Cuts blinding glare while filtering blue light to enhance visual acuity and improve depth perception. Features an Iridium® coating to further tune contrast.
	Polarised VR28 Lens	16%	3	Sunny	Contrast	Sport performance lens for medium to bright light. Cuts blinding glare while filtering blue light to increase contrast and improve depth perception in a wide variety of conditions.
	Positive Red Iridium Lens	15%	3	Medium to Bright Light	Contrast	Medium to bright light. Features a neutral lens tint with an Iridium coating to tune contrast and reduce glare.
	Ruby Iridium Lens	14%	3	Medium to Bright Light	Neutral	Medium to bright light. Neutral lens tint for truer color perception. Features an Iridium coating to reduce glare. Excellent in hot, sunny conditions.
	Shallow Blue Polarised Lens	20%	3	Medium to Bright Light	Contrast	Fishing Specific. Designed to knock down glare in shallow water conditions while improving depth perception and enhancing the ability to read underwater terrain. Ideal for sight fishing on rivers, lakes, or saltwater flats.
	Slate Iridium Lens	23%	2	Medium Light	Neutral	Medium light. Neutral lens tint for truer color perception. Features an Iridium coating to reduce glare.
	Titanium Clear Iridium Lens	54%	1	Low Light	Neutral	Low light only (indoor or overcast). Subtle Iridium® coating reduces glare caused by artificial lighting.
	Titanium Iridium Lens	10%	3	Extremely Bright Light	Contrast	Extremely bright light. Sharpens visual acuity and improves depth perception. Features an Iridium coating to reduce glare and balance transmission.
	Transitions Black Persimmon Lens	42% to 10%	2	Flat to Bright Light	Contrast	Sport performance lens for flat to bright light. Filters blue light to boost contrast and increase depth perception in a wide variety of light conditions. Excellent for mountain biking and golf, and any other sport that takes you in and out of shaded areas.
	Tungsten Iridium Lens	15%	3	Sunny	Contrast	Medium to bright light. Sharpens visual acuity and improves depth perception. Features a subtle Iridium coating to reduce glare and tune contrast.

Colour	Lens Name	Transmission	Protection	Conditions	Contrast	Description
	Tungsten Iridium Vented Lens	15%	3	Sunny	Contrast	Medium to bright light. Sharpens visual acuity and improves depth perception. Features a subtle Iridium coating to reduce glare and tune contrast.
	Violet Iridium Lens	55%	1	Medium to Bright Light	Contrast	Medium to bright light. Features a neutral lens tint with an Iridium coating to tune contrast and reduce glare.
	VR28 Black Iridium Lens	18%	2	Medium to Bright Light	Contrast	Medium to bright light. Filters blue light to increase contrast and improve depth perception in a wide variety of conditions. Features an Iridium coating to diminish glare.
	VR28 Black Iridium Polarised Lens	10%	3	Extremely Bright Light	Contrast	Sport performance lens for extremely bright light. Cuts blinding glare while filtering blue light to enhance visual acuity and improve depth perception. Features an Iridium coating to further tune contrast.
	VR28 Blue Iridium Vented Lens	15%	3	Medium to bright light	Contrast	Medium to bright light. Utilizes a contrast-enhancing VR28 lens tint with an Iridium coating to further tune contrast and reduce glare.
	VR28 Gold Iridium Lens	17%	3	Medium to Bright Light	Contrast	Medium to bright light. Filters blue light to increase contrast and improve depth perception in a wide variety of conditions. Features an Iridium coating to diminish glare.
	VR28 Lens	28%	2	Flat to Medium Light	Contrast	Flat to medium light. Filters blue light to increase contrast and improve depth perception in a wide variety of conditions.
	VR28 Polarised Lens	16%	3	medium to bright light	Contrast	Sport performance lens for medium to bright light. Cuts blinding glare while filtering blue light to increase contrast and improve depth perception in a wide variety of conditions.
	VR35 Gold Iridium Lens	23%	2	Medium Light	Contrast	Medium light. Subtle tint with an Iridium coating to tune contrast and reduce glare.
	VR50 Brown Gradient Lens	24%	2	Medium Light	Contrast	Medium light. Subtle, contrast-boosting tint with smooth transition in shading from darker top to lighter bottom. Excellent all-purpose lens.
	VR50 Photochromic Lens	50% to 10%	1	Flat to Bright Light	Contrast	Sport performance lens for flat to bright light. Subtle tint that boosts contrast in a wide variety of light conditions. Excellent for mountain biking and golf, and any other sport that takes you in and out of shaded areas.
	VR50 Photochromic Vented Lens	50% to 10%	1	Flat to Bright Light	Contrast	Sport performance lens for flat to bright light. Subtle tint that boosts contrast in a wide variety of light conditions. Excellent for mountain biking and golf, and any other sport that takes you in and out of shaded areas.
	VR50 to Brown Transition Lens	50% to 10%	1	Flat to Bright Light	Contrast	Sport performance lens for flat to bright light. Subtle tint that boosts contrast in a wide variety of light conditions. Excellent for mountain biking and golf, and any other sport that takes you in and out of shaded areas.
	VR50 Transitions (Vented) Lens	50% to 10%	3	Flat to Bright Light	Contrast	Sport performance lens for flat to bright light. Subtle tint that boosts contrast in a wide variety of light conditions. Excellent for mountain biking, trail running, or any other sport that takes you in and out of shaded areas.
	Warm Grey Lens	10%	3	Extremely Bright Light	Neutral	Extremely bright light. Comfortable lens tint that offers truer color perception.
	Yellow (Vented) Lens	90%	0	Flat to Very Low Light	Contrast	Flat to very low light. High contrast lens, ideal for low-light sport applications such as target shooting or night skiing/snowboarding.
	Yellow Lens	90%	0	Flat to Very Low Light	Contrast	Flat to very low light. High contrast lens, ideal for low-light sport applications such as target shooting or night skiing/snowboarding.
