

Leading Provider of Standalone Conference Bridge

## ConferLink CL-800 v2

Reservation-less Network-connective Teleconference Bridge  
Suitable For Small-to-Large Sized Organizations

CL-800 v2 isn't merely an 8-port box that is capable to bridge 8 different Central Office or PBX extension lines for allowing a max of 8 callers to converse in almost the same way as they are used to do in company's meeting room. In addition, a CL-800 v2 is capable of linking up with another CL-800 v2 for expanding the bridge capability to 14 lines allowing a max of 14 callers to talk in between. Furthermore, CL-800 v2 is the box supporting direct connection with a PC thru a network cable for incorporating the Discuss II, the Multisuns particularly developed bridge software that enhances bridge capabilities with additional features like multiple meeting rooms support, phonebook, password change, automatic email notification about upcoming meeting, scheduling caller service, etc...

CL-800 v2 coupled with Discuss II highly demonstrates speed, immediacy and convenience of meeting. Armed with CL-800 v2 and Discuss II, employees and/or clients can come together rapidly to communicate and collaborate over the phone, particularly in urgent or emergency situations. This facilitates the timely exchange of information among employees and clients and helps increase organization decision making efficiency.

CL-800 v2 is a self-contained unit and works right out of the box. It is easy to use and inexpensive to maintain. CL-800 v2 together with Discuss II is a suitable choice for small-to-large sized organizations and fit best to any of the organizations wishing to ensure sensitive teleconferencing information to only deliver to intended persons in cost effective manner.

**CL-800 v2** *Improves Enterprises Efficiency, Effectiveness and Quality of Service*

CL-800 v2 allows an authorized person to use the 0-9, \* and # buttons located on station/mobile phone keypad to call up an urgent meeting by having the system to help dial from its virtual meeting room to targeted attendees and forcefully inviting them join. With CL-800 v2 supervisory persons can call up a meeting over the telephone at anytime anywhere.

Discuss II can help notify target attendees by email about upcoming teleconference meetings. It can voluntarily help place calls out from CL-800 v2 to target attendees exactly before meeting start time and bring them into the meeting room upon answering of the calls. CL-800 v2 together with Discuss II reduces the total time organizations take to inform and call up a meeting.

Since CL-800 v2 is installed in-house, no additional charge will incur when setting up a teleconference meeting. In addition, calls placed from within the organization to CL-800 v2 will have no charge and calls placed from outside the organization to CL-800 v2 will have same charge as normal phone calls. CL-800 v2 is an economic tool for organizations to hold a meet-me or last-minute style of conference meeting.

## KEY FEATURE LIST

### CL-800 v2

- Plug and play: Once phone line connection is done, it is ready for servicing.
- Meet-me style conference: Participants can voluntarily join the meeting at prescheduled date and time using normal station/mobile phone.
- Last-minute style conference: Organizer can call from the meeting room forcefully inviting target attendees to join by using normal station/mobile phone.
- Security lock: Organizer can lock/unlock meeting room to prevent/invite additional attendees for participation.
- Password protection: Administrator, organizer and participants are given with a different password.
- Participant screening control: Joining a meeting needs password authentication.
- Entry and exit tones: Distinct entry and exit tones announce the arrival and departure of each attendee.
- Audio announcement of room-full: The voice prompt "... room is full" if the organizer is attempting to call from the room to invite excessive attendee to join the meeting.
- Multilingual meeting guidance: Voice prompts in Chinese, English or Japanese are available.

- Audio helps: Attendees can activate audio guidance whenever needed.
- Computer network connection: Ethernet connection supported.
