

# Butler II – Pushbutton Paging Solution

The Butler II has been developed to increase customer service levels and improve staff responsiveness. The simple push-button transmitter is easy to use and may be attached to any surface. Each Butler II can be customized with specific messages that alert staff via alphanumeric pager with the touch of a button.

## Ideal for many industries :

- medical offices
- Grocery Stores
- Retail Outlets
- Nursing Home
- Manufacturing Facilities
- Salons and Day Spas
- Restaurants

## Messages can be customized For example :

- “Register 1 need weighting on vegetable”
- “Assistance needed in room 3”
- “Manager override needed at register 6”
- “Treatment room 2 is vacant”

## System Features

- Wireless programmability - Reprogram pager numbers from any Butler II unit.
- Notification Acknowledgement - Allows the recipient of a page to confirm receipts at the unit.
- Disable Code - staff may disable transmitter with a push of a few buttons
- Range - Pages up to ¼ mile
- Wireless - There's no complicated wiring involved
- Battery - Uses 3AAA batteries for 6-12 months (depending on usage)
- Compact Size - 1.5" x 7" x .875"

Optional repeater  
Extend coverage area
