

Refractometer เครื่องวัดค่าความหวาน RHB-32ATC-NEW

MODEL NUMBER : RHB-32ATC-NEW

► Brief Description

This Latest Brix refractometer is used for sugar related liquids such as fruit juice, soft-drinks, wine, honey etc. It also helps to control the sugar concentrations in foods and beverages. Furthermore, brix refractometer is able to check the ripeness of fruit in the field, verifying quality of product after harvesting or controlling concentrations during processing and packaging.

RHB-32ATC-LATEST is commonly used for controlling the concentration of various industrial fluids (cutting lubricants and flux rinsing compound).

► Features

- Sturdy and light weighted Aluminum body
- High quality and accurate testing result
- ATC Compensation Range (i.e. Built-in Automatic Temperature Compensation System) from 10°C to 30°C
- Easy and very convenient to use

► Specification

- Test Range : Brix 0 - 32%
- Min. Div. : Brix 0.2%
- Accuracy : Brix \pm 0.20%
- Automatic Temperature Compensation System (ATC)
- Latest version : Twist directly on the built-in calibration knob for direct calibration (No screw driver is required!)
- Sturdy and light weighted Aluminum body
- Item length : approx. 168 mm
- Item Weight : approx. 165g
- Rigid Imitation Leather Box with sponge padded for maximize protection
- **1pc pipette + 10pcs extra pipettes for free**

► One Set Included

- 1pc x Latest Brix Refractometer
- **1pc pipette + 10pcs extra pipettes for free**
- 1pc x instruction manual
- Protective fabrics pouch with white box
