

Our Most Popular Magnetic Mini-Stirrers

Speedsafe™

MAGNETIC STIRRERS

- **Compact size**

The compact size of these stirrers allow users to maximize bench space for efficiency and safety.

- **Safety**

Speedsafe™ limits the maximum speed to 1000 rpm even if a load is suddenly removed.

- **Built to last**

The ABS housing of HI 190M and HI 190M-0 resists most harmful chemicals in the lab.

The HI 190M, HI 190M-0 and HI 200M are compact and lightweight, so that lack of laboratory bench space is no longer a concern.

These stirrers incorporate electronic controls that allow the user to regulate the speed with greater precision. Often, in the lab, a sample is removed from the stirrer before reducing the speed. This would cause the motor of conventional equipment to accelerate until it is destroyed. This does not pose a problem with HANNA mini-stirrers. In fact, the internal Speedsafe™ mechanism will ensure that the maximum speed is never exceeded.

HI 190M and HI 190M-0 come supplied with an ABS cover that will resist the harmful effects of chemicals that are accidentally spilled. The ABS-covered mini-stirrer is available in two versions: HI 190M operating at 110 or 220 VAC and HI 190M-0 at 12 VDC. This provides you with the flexibility to choose between field and lab models, as well as being able to use the HI 190M-0 for applications where a low input voltage is a must.

HI 200M has an AISI 316 stainless steel cover. This model is ideal for applications that create exothermic reactions.
